PROFUNDIDAD DE LA PALA / SHOVEL DEPTH

Se ha aumentado la profundidad en la pala, permitiendo contener más liquido o alimentos y proporcionando así una mayor comodidad al usuario al permanecer la comida más estable dentro de la cuchara, sin derramarse.

The depth of the scoop has been increased, allowing it to hold more liquid or food and thus providing greater comfort to the user as the food remains more stable inside the spoon, without spilling.

CURVATURA DEL CUELLO / NECK CURVATURE

Diseñada para mejorar la ergonomía. Facilita el movimiento natural de la mano al llevar la comida a la boca, haciendo que el gesto sea más cómodo y fluido.

Designed to improve ergonomics. Facilitates the natural movement of the hand when bringing food to the mouth, making the gesture more comfortable and fluid.

CURVATURA DEL TALÓN / HEEL CURVATURE

Curvatura del talón más pronunciada que mejora el balance de la cuchara en la mano dando una sensación de mayor estabilidad.

More pronounced heel curvature improves the balance of the scoop in the hand giving a more stable feel.

Kaji

Kaji

Conjunto Chuletero / Steaknife set

Diseño moderno con alma de tradición japonesa.
Modern design with Japanese tradition.

Inspirado en los cuchillos japoneses Kiritsuke, Kaji es una pieza de diseño único. Su hoja con acabado damasco revela el saber hacer artesanal con linias ligeramente curvadas para un corte preciso. El mango, de madera maciza con un toque de color, reinterpreta los mangos octogonales tradicionales para la mesa moderna, ofreciendo ergonomía y equilibrio perfectos.

Le acompaña un tenedor con dos puntas y mango simétrico, completando un conjunto icónico y exclusivo. El Nombre Kaji significa "forja" o "fuego" en japonés, refleja el proceso meticuloso de creación de esta pieza única.

Inspired by the Japanese Kiritsuke knives, Kaji is a unique piece of design. Its damask-finished blade reveals the craftsman's know-how with slightly curved lines for a precise cut. The handle, solid wood with a touch of colour, reinterprets traditional octagonal handles for the modern table, offering perfect ergonomics and balance.

It is accompanied by a fork with two prongs and a symmetrical handle, completing an iconic and exclusive set. The name Kaji means 'forge' or 'fire' in Japanese, reflecting the meticulous process of creating this unique piece.

Uno de los proyectos troncales que se desarrollaron en la 18a edición del Master en Diseño y Desarrollo de Producto, fue el proyecto que Comas propuso a los alumnos del Master. El reto consistió en diseñar y desarrollar un cuchillo icónico que pudiera complementar algunas de las colecciones actuales de nuestro catálogo.

Los 26 alumnos del Master, repartidos en 5 grupos, en la 1a fase conceptual presentaron 26 propuestas de diseño de nuevos cuchillos, de los cuales desarrollaron 12 propuestas con todo detalle y llegaron a un prototipo volumétrico de calidad, siguiendo las indicaciones de la empresa.

El acero 5CR15Mov tiene una baja porción de carbono lo que lo hace un material de gran dureza, por lo que el filo conserva más tiempo la capacidad de corte.

Además, ofrece una gran resistencia a la corrosión con más del 15% de cromo.

5CR15Mov steel has a low carbon content which makes it a very hard material, so the cutting edge retains its cutting ability for a longer period of time.

In addition, it offers high corrosion resistance with more than 15% chromium.

Madera estabilizada
Stabilised wood

Material fabricado mediante la inyección de resinas termoestables y color en la madera. Con esta inyección de resina se obtiene un sellado de mayor dureza, impermeabilidad y resistencia.

Además, con el color podemos personalizar la madera y crear diferentes patrones y variedad de gamas dándole un toque de sofisticación y originalidad al cuchillo.

Material manufactured by injecting thermosetting resins and color into the wood. With this injection, a seal of greater hardness, impermeability and resistance is obtained.

In addition, with colour we can personalise the wood and create different patterns and a variety of ranges, giving a touch of sophistication and originality to the knife.

Acero de carbono

El 52100 es un acero al cromo con alto contenido en carbono que ha ganado popularidad en el mundo de la cuchillería para hojas de alto rendimiento.

Conocido por su excepcional dureza, resistencia al desgaste y retención del filo, se utiliza a menudo en cuchillos personalizados de gama alta que requieren una durabilidad superior.

Al ser un cuchillo no inoxidable, se le ha aplicado una pátina negra en toda la hoja para evitar que se oxide fácilmente. Aún así aconsejamos lavarlo siempre a mano y secarlo rápido.

Si se guarda durante tiempo es aconsejable untar de aceite mineral la hoja y la espiga así como guardalo protegido con funda o saya.

Carbon steel

52100 is a high-carbon chrome steel that has gained popularity in the world of high-performance knife making.

Known for its exceptional hardness, wear resistance and edge retention, it is often used in high-end custom knives that require superior durability.

As a non-stainless knife, a black patina has been applied to the entire blade to prevent it from rusting easily. Even so, we advise to always wash it by hand and dry it quickly.

If it is stored for a long time, it is advisable to smear mineral oil on the blade and tang and to keep it protected with a saya.

Raíz de abedul estabilizada

El mango, de raíz de abedul estabilizada proporciona a la colección la elegancia de una madera noble.

El proceso de estabilización protege y sella la porosidad de la madera para garantizar una mayor durabilidad y resistencia, además de resultar muy agradable al tacto.

Aún siendo un material duradero y resistente es importante evitar el lavavajillas y mantener siempre el cuchillo seco.

Stabilised birch root

The handle, made of stabilised birch root, gives the collection the elegance of a noble wood.

The stabilisation process protects and seals the porosity of the wood to ensure greater durability and strength, as well as being very pleasant to the touch.

Yet being a durable and resistant material, it is important to avoid dishwashing and to always keep the knife dry.
